## Kitchens and Bathrooms

DESIGN | INSPIRATION | INNOVATION | ANNUAL 2012/13

### CUT & COLOURED

Shaped and coloured tubs are at the cutting edge of bathroom design, such as this A-cero for L'Antic Colonial, from the Spirit collection at Porcelanosa. The bold expression is based on natural materials, marrying straight and curved lines, wood and natural stone. Its sculptural, organic appearance offers visual impact, complemented by an oak-finish unit that contributes dynamism to the design. [www.porcelanosa.com](http://www.porcelanosa.com)

### FLOATING VANITY

Vanities have long been considered a functional piece in the bathroom, providing storage and a place to house the basin. However, its value as a furnishing element has seen the vanity evolve into a centrepiece to inspire homeowners. Cue floating vanities – the fast-track way to refresh and modernise a bathroom space. Simply hung from the wall, the floating vanity offers clean, modern lines that save on space, making it the perfect solution for smaller bathrooms. Paco Jaanson's Kong vitreous china washbasin sits elegantly on a timber floating vanity to create a pared-back feature, a breath of fresh air in the bathroom.
