### Paco Jaanson on RING 65

Paco Jaanson's *RING 65*.

*and little* basins is the latest addition to famous Italian designer Maurizio Duranti's large portfolio of cutting-edge, world renowned designs.

Born in Florence in 1949, Maurizio graduated as an architect almost 30 years

later – this architectural background has long been inherent in Maurizio's designs, later concentrating his efforts on creating stunning bathware products.

Maurizio is known mostly for his affinity with angular designs but has moved away from this trend with *RING 65*. *and little* basins, creating a collection with softer curves that fit in well with the more understated of bathrooms – yet still remaining ultra modern.

There are two different styles within this new collection. *RING 65*. comes with a tap landing and *little* comes without - offering the choice of incorporating a different style of bench or wall mounted basin mixer to accompany the *little* basin.

### Samsung's new washer

With a 4.5 star WELS rating the new Samsung WD8122CVW is one of the most water efficient washer/dryers available in the market. The high rating means consumers who purchase the model in NSW and WA are eligible to receive a rebate following the recent WELS benchmark changes.

Another key environmental feature is the AirWash system. This technology eliminates the need for water and harsh chemicals by using a unique five stage process that penetrates heated fresh air deep into fabrics to remove odours and bacteria.

The Silver Nano Health System adds silver ions to your wash, killing 99.9% of bacteria present in minutes. The silver remains in your clothes, inhibiting bacteria growth for around 30 days.

The conveniently combined 6kg drying machine also provides an effective in-built condenser dryer which drains away the condensed hot air rather than creating unpleasant condensation on the walls of your laundry.
