### Fashionably water-wise

Designed by Italian industrial designer Giulio Iacchetti, the 'Drop' shower is one of the most ironic yet practical eco-friendly shower heads on the market. Inspired by the shape of a water drop, it is made of silicone so has a thermal stability of up to 250° and a high resistance to oxygen, ozone and sunlight. And because it is non-stick, Drop doesn't allow for lime deposits to build up. It comes with a flow restrictor already installed limiting the flow rate to 7.5L/m.
