**BATHROOM UPDATE**

10 With distinctive forms and colours such as pastel green and deep purple, the Kong Colour basin range from Paco Jaanson offers a cool retro flavour for contemporary bathrooms.

11 Zucchetti's Soft series hob-mounted bath set was designed by Roberto and Ludovica Palomba, who aimed to create an archetypal object. It accommodates a mixer, diverter, single-setting hand shower and spout in the single unit. The Soft series is available from Streamline Products.

12 Matraia from Casalgrande Padana's new Titano series of unglazed porcelain tiles is one of seven shades available in the range. Pigments and veins are visible throughout the 10 mm thick tiles, which are made in four sizes and with four surface finishes. These tough and durable tiles are available from Classic Tiles.

13 Art Ceram's La Fontana semi-recessed basin uses a simple bend to create a smooth edge for contact with the body. Designers Sandro Meneghello and Marco Paoletti created a basin just as attention-grabbing as the bold bidet and wall-faced suite that are also in the range. The range is available from Gieffe Interior Environments.

14 It looks like a light - and it is, as well as a shower head and music player. Newform's generously sized Lounge shower head, designed by Massimiliano della Monaca, is manipulated with a separate control unit. Magnetic-transduction-based speakers broadcast the sounds, while a set of LEDs offer various shades of light. This stainless steel wonder is available in two sizes from Brewers.

15 Falper's Shape range by Michael Schmidt, available from Rogerseller, transforms the bathtub into a sculpture. Made with Cristalplant solid surface, the tub has a satiny feel. Semi-built-in and freestanding versions are also available.

16 Designed by Patricia Urquiola, this pedestal version of the Pear washbasin was recently added to Agape's range. The monolithic form can be freestanding or placed against a wall. It is available from Artedomus.

17 For those with a low tolerance for visual clutter, Kohler's WaterTile delivers a deluge with a clean look. The low-profile design eliminates ceiling protrusions, allowing you to focus on the downpour.
