TAP INTO IT

GESTO KITCHEN MIXER
\$1150, Paco Jaanson

- Single-hole sink mixer ideal for smaller spaces and sinks
- Hot and cold side levers for smooth temperature and water-pressure control
 - Italian design

It's essential to choose a kitchen tap and sink carefully – look for designs that you love but which are also practical, durable and fit with your lifestyle and decor. Wash-up areas are used frequently but, unlike dishwashers, fridges and other electronic goods, they can't be hidden away in a cupboard or cabinet! The most popular and sensible choice for kitchen taps is stainless steel, which is durable and stylish, and there's a vast array of designs to choose from. Here are some new and functional taps that look good too!

COMPILED BY SELINA GORDEVICH
