

## Add a little Italian style

**A** NEW range of modern bathroom basins add an Italian flavour to bathrooms.

Made in Italy, Urban is a range of above-counter basins that are easy to clean and manoeuvre due to their shallow design.

With a blend of theoretical and practical living, the collec-

tion has been created by a number of designers with industry experience and international reputations.

This means homeowners now have the chance to combine a unique piece of art into their bathroom creation.

The basins also give a contemporary edge to the bathroom

interiors and embrace an individual sense of aesthetic with the Paco Jaanson mark of quality and style, without the hefty price tag.

The collection was designed for the style-conscious 'recessionista' and to suit myriad personal tastes.

Urban basins are distributed nationally through Paco Jaanson.

The bathroom becomes a place of beauty with modern design
