

**Aeri in Ebony basins and tapware from Paco Jaanson.**

**The latest basins combine retro and modern design.**

# Modern meets retro in style

**BETH MUHLING**

Add a chic touch to your bathroom with Paco Jaanson's new bathware range, Aeri in Ebony.

The new series is a technically advanced collection of basins, vanities and mirrors in ebony-coloured birchwood timber. This is the latest in the Aeri series following a range in a light timber finish, and another in aluminium. The simple design is complemented by the streamlined Aeri Ebony Tap.

The Spanish collection, which combines retro and modern design, is made from natural birchwood with an ebony finish.

The units are

manufactured through an advanced and intricate technology process and are protected by a high-grade marine lacquer.

The product has been tested and approved by the Spanish Technological Institute of Furniture for water resistance and resistance to cleaning products.

The collection will suit anyone looking for something different.

**The Aeri Ebony Tap starts at \$599 and prices for the other items in the range start at \$770 for the 380mm basin. Call Paco Jaanson on 1800 006 260 or visit [www.pacojaanson.com.au](http://www.pacojaanson.com.au) for stockists.**
