**MY KITCHEN...**

**MATT MORAN**  
Even in his spare time, this chef is unable to step away from the kitchen

**Q My kitchen is a space...** Where I am on weekends, cooking for my family. People tend to think that, being a chef, the last thing I want to do is cook at home but, for me, it's the opposite - I find it relaxing and therapeutic.

**Q Every kitchen should have...** A good layout - maybe it's the chef in me. It's all about where the sink, fridge and oven are in the work triangle layout. Bench space is important, along with a good knife set!

**Q In my kitchen, I couldn't live without...** My new LG lightwave oven - I just love how it cooks things so quickly.

**Q The most overlooked element of the kitchen...** Is, for me, my cool room. When my house was being built, I designed the kitchen then the house. I was told that I didn't need a cool room but I can tell you, it's always full and I generally bring home boxes of food, not bags.

**Q In my dream kitchen, I would have...** Everything I want, including a concrete benchtop, which is what I have. As I built and designed it, my kitchen at home is actually my dream kitchen.

For more on Matt, visit [mattmoran.com.au](http://mattmoran.com.au).

*eternal sunshine*
